Tinybird.co
Company principles
Knowing what we are and what we do, and opposing what we are not and will never do, will reduce the amounts of discussions significantly and will help us to focus on our mission.
1. Open-minded

Remember that you’re looking for the best answer, not simply the best answer that you can come up with on your own. Push for perfection, but never at the expense of progress. Validate stuff ASAP.
2. Ego-free

Don’t worry about looking good; worry about what we are trying to achieve.
3. Async and remote

Focus on efficiency and productivity. Choose from where and when you work, so you can adapt your work to your life and not the other way around.
4. Accountability driven

Think like an owner, and expect the people you work with to do the same. Focus on outcomes rather than tasks. Plan. Do. Check, and Act.
5. Frugal

Use company's resources wisely. Constraints help you thinking creatively.
6. Transparent
Share everything internally, especially the things that are hardest to share. Be very sensitive with what you share externally.
7. In $\_\text{god\_}$ we trust, all others bring data

Data should act as the foundation for our decision-making process, not as a substitute for our own judgment.
8. API first

We build products by developers for developers. Treat our APIs as UIs of our products.
9. Speed Wins

Speed compounds over time. Faster decisions lead to faster delivery, faster feedback loop. Faster APIs lead to less infrastructure, money that can be invested elsewhere. Faster UIs lead to better user experiences and happy customers.

Speed is the ultimate feature and differentiator.
